TURN TO CIA LIBRARY

1. A second lieutenant of the Czechoslovakian tank arm delivered a lecture on tanks to the SNB company in Nyrsko (N 50/U 99) on 2 December 1949. He said that a new tank of Czech design was being manufactured, which would have combined armor (or sandwich). Between two layers of high quality armor plating would be a special substance described as "shellproof resistance insulation." No further information on the tank was given.
